To calculate AMB, you need to add each day's end-of-the-day balance and divide it by the number of days in that month. AMB for a quarter will be average of AMB maintained in the 3 months of that quarter. APR will be updated on 10th of beginning of every calendar quarter.</p> <p>Quarters are defined as follows: January, February and March as Quarter 1; April, May and June as Quarter 2; July, August, and September as Quarter 3 and October, November and December as Quarter 4. APR for Quarter 2 will be considered on the basis of average monthly balance for Quarter 1. For eg. The APR (Annualized Percentage Rate) of the quarter 1st Apr-30th Jun will be updated on 10th July.</p> <p>Illustration:</p> <p>On January 1, the balance in the Operative account is Rs 50,000. On January 12, withdrawal of Rs 4,000 takes place. EOD balance is Rs.46,000. On January 18, deposit of Rs 20,000 takes place. EOD balance is Rs 66,000. Summing up the EOD balances: For 11 days-from January 1 to January 12-sum of EOD balance will be Rs (50000*11) = Rs 5,50,000 From January 12 to January 18, sum of EOD balances will be Rs (46,000*6) = Rs 2,76,000 From January 18 to January 31, sum of EOD balances will be Rs (66,000*13) = Rs 8,58,000. Sum of all the EOD closing balances = Rs 16,84,000 Total number of days in January = 31 So, the average monthly balance will be 1684000/31 i.e. Rs 54,322.58 Similarly, for February and March, Average monthly balance is Rs. 70,000 and Rs. 95,000/- respectively then AMB for the Quarter will be (54,322.58 + 70,000 +</p>				Average Monthly Balance for last Quarter	Annual Percentage Rate (APR %)	less than Rs. 50,000*	47.88% (3.99% per month)*	Rs. 50,000 - 3,00,000	32.28% (2.69% per month)	Rs. 3,00,001- 10,00,000	20.00% (1.69% per month)	More than Rs. 10,00,000	8.28% (0.69% per month)
