We care. We cure

STATE-OF-THE-ART MULTISPECIALTY TERTIARY CARE REFERRAL CENTRE

Rajagiri Hospital is an initiative from the renowned Rajagiri (CMI) Group of Institutions based in the pristine State of Kerala (India) to provide world class tertiary healthcare services.

The hospital is well laid out in a 40 acre green landscape in the serene setting of Chunangamvely, Aluva and is the closest facility to the Cochin International Airport. The 550-bed multi-specialty tertiary care hospital features all modern medical services, ranging from diagnostics to therapy to rehabilitation, under one roof. At Rajagiri Hospital, we are proud to bring you the latest advancements in surgical technology - Da Vinci Xi Robotic-Assisted Surgery. With unparalleled precision & minimal invasion, this cutting-edge surgical system is revolutionizing healthcare and transforming the way surgeries are performed.

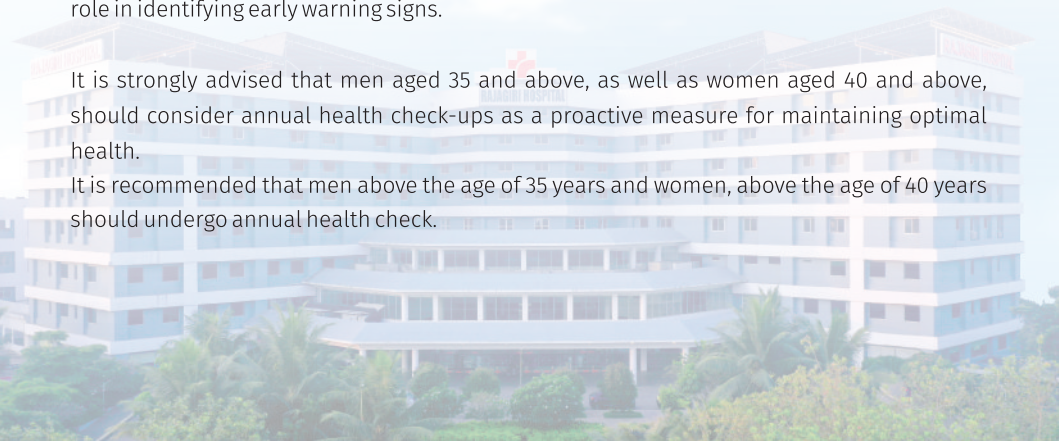

Rajagiri Hospital is accredited by the Joint Commission International (JCI) with the gold seal for complying with the highest international standards on patient safety and quality of care. The hospital is also accredited by the National Accreditation Board for Hospitals and Healthcare Providers (NABH) and National Accreditation Board for Testing and Calibration Laboratories (NABL).

Importance of Regular Health Check-ups

In the fast-paced lifestyle prevalent today, individuals often become deeply immersed in their daily routines, leaving little time for essential physical activity to uphold overall well-being. Additionally, contemporary dietary patterns exert prolonged impacts on the body. In such circumstances, the significance of undergoing regular health check-ups on a yearly basis becomes pivotal in detecting any latent health risks. This is particularly crucial for individuals with a notable family history of conditions like diabetes, heart disease, cancer, high cholesterol, or elevated blood pressure levels, as preventive health checks play a crucial role in identifying early warning signs.

It is strongly advised that men aged 35 and above, as well as women aged 40 and above, should consider annual health check-ups as a proactive measure for maintaining optimal health.

It is recommended that men above the age of 35 years and women, above the age of 40 years should undergo annual health check.
